Getting started with Android for SPEAr eMPUs

Getting started with the Android OS on SPEAr1340

- Floid (flexible Android) aims at providing an open and stable Android BSP for ST's SPEAr1340 platform users and developers

- Commercial support for floid developers is provided by our partner, Wind River

- Key features are:
  - Android 2.3 Gingerbread
  - Android 4.0 ICS

- Get source code, pre-built images, building instructions and other docs on:
  http://code.google.com/p/floid/
